

## Scholarships and Fundraising (for residential students only)

The study fees required to study full-time at NETS only cover about 50 % of the actual cost (salaries and administration). The actual cost per full-time student is N\$40,000. We therefore need the help of all students to raise additional funds and scholarships in order to reach the target of N\$40,000.

By signing this letter I agree to the following:

1. I will assist the administrator with the application for scholarships from overseas donors by providing testimonies and regular letters and reports to donors.
2. If I receive a scholarship I am committed to meet the deadlines for writing letters and reports.
3. If I receive a scholarship I agree to work on the NETS campus for 2 hours per week as part of a scholarship duty.
4. I am committed to build up a group of donors that are willing to pay part of my study fees. NETS will provide guidance and assistance. *(if you succeed in building up a support group during your studies at NETS the same people may be willing to continue their financial support in your ministry after you have graduated from NETS)*
5. My photo and testimony may be used for NETS publications.
